Introduction

Nintendo released a game device called the nintendo switch and there is a game on it called Super mario odyssey is a game of mario but in 3d you free roam around the **Kingdoms** the game includes kingdoms,bosses, and characters/creatures and you have to defeat bowser, and get the moons and super mario odyssey was released in 2017 october 27,and according to tign.com 4.7 million games of super mario odyssey games have been sold.Mario's first appearance was in donkey kong 1981.

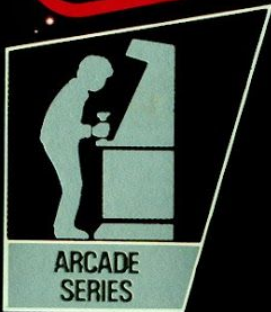

The Original!

DONKEY KONG[®]

ARCADE CLASSICS SERIES

Nintendo ENTERTAINMENT
SYSTEM[™]

Kingdoms

Kingdoms are some of the most important part of the game they are like levels but there are so many of them for example my least favorite kingdom is metro kingdom it is like a city after you defeat the killer bug that is at the top of the tower and you have to defeat it,there are **koopas** challenges,hidden moons,people,and bosses the boss that runs the kingdom he is donkey kong he is in a pixel challenge and you have to stomp on his head to defeat him.

There are 17 kingdoms in all of the whole game!The hardest kingdom is the dark side of the moon there are some of the hardest bosses of the whole game!.one of the koopas challenges are where you have to remember the footsteps and walk on the line to get the perfect score then you get a moon for your reward.

What makes a kingdom is koopas challenges, bosses, people to help guide you if you need help and moons.

There are lots of moons in each kingdom.

Cap kingdom is the first place you are there are 31 power moons,there are 13 moon rock unlockable power moons, there are 50 power coins in the whole kingdom.There are 950 power coins in the whole game.

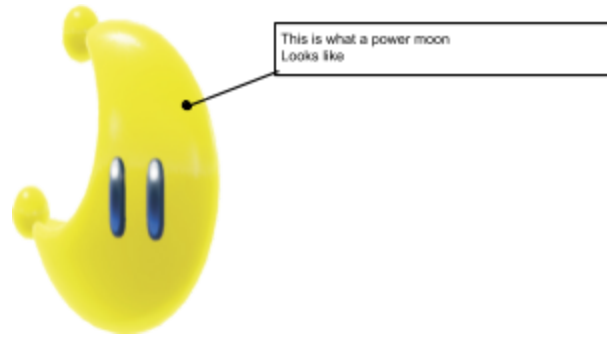

This is what one of the kingdom in super mario odyssey there are lots of hard parts of this kingdom but it is also really fun, this is the 3rd kingdom in the game. It is called the sand kingdom but the weird thing is that it looks like a desert but it is really cold some are the cool stone they help you see stuff that you can not see yourself another are the golden leopard you can ride him and he can go in the poisonous water and he can also run really fast.

Moons

Moons are like coins but they power the odyssey so that you can go to the next **kingdom**,

Another part a moon can do is you can spend them on stuff including to do special

Task's and to get coins and to beat bosses but you will get them back if you beat the boss.

them. some moons are really hard to find for example in seaside kingdom you have to go in a cave were if the seawide catches you your dead. There are 999 moons in the whole game and some are really hard to find for example in sand kingdom there is one were you have to have good acrobatics and skill it is were you need a bullet bill but there are none. The hardest part about trying to get a moon is that when there is an invisible passage and you have to go into all of the walls on the interior map it is pretty annoying but you can not do that if you can travel 5,000 times faster with the **morphs** for example in metro kingdom there is a motor scooter that you could ride on.

This is what bullet bill looks like when you transform into him in super mario odyssey.

Bosses

Bosses are like the monsters or bosses but thank god they are animated because these are some of the most scary terrifying and creepy bosses and i'm going to introduce them to you.

Bowser is one of them he is a monster looking guy he has a shell on his back and he can breath fire with giant claws, another boss is my favorite one he is a octopus that can shoot flaming pulses of water and drinks sparkling water and has a **army** of little squids but you have to defeat him with them. If you defeat a boss you will get three moons but other bosses will give you more power moons. The hardest boss according to gamefags.com that the world

doesn't like is the knocklote 46.3 people think that he is the hardest ever you have to defeat him with his hands when they slam on the ground and throw your hat at him then take control over the hand then you fly it straight into his face then you have to do it 3 times then for your reward you get 3 moons! And personally I think he is actually the hardest boss out there

There are at least 2 or 3 bosses a kingdom for example in the moon kingdom aka bowsers wedding there is the mother brodals, bowser and the giant bullet bill. If you get really mad sometimes you might heart your ****.

Cappy

Cappy is the hat that you have and it is magical the magic part is that if you throw it at stuff you transform into the creature or object and do its ability for example if you throw him at a creature and you can transform into it.

This is what cappy looks like in a =
Dirogram.

Cappy is a talking cap and is like mario's sidekick and but he is super powerful,also when you hold the fire for 5 sec. And if you run into it you will jump super higher than normal for example in the mushroom kingdom and you hold it and run into the castle (peaches castle) you can jump onto the tower on the right spot you can get up there you can also customize your cappy,when you go into the purple and coin hut it will give you the option to select the theme of your hat depending on what kingdom you are on for example in the snow kingdom it will give you a santa hat along with you can customize your mario outfit in all of the kingdoms.

Cappy can give you power to beat super hard bosses for example in the cloud kingdom you have to defeat bowser and you have to throw your hat at his hat so you can take control and defeat him with the punch 3 times and when you throw cappy at him you have to have good aim to take control.

According to "<https://www.mariowiki.com/Cappy#History> Cappy's history his first appearance in super Mario run and why did they do that we still don't know but maybe they wanted to do it so the fans will get a glimpse at the new character so they will know what to expect in the next Mario game.Cappy looks like a white hat with blue hair,also he has eyes so he could see,and he can also talk because he is like your story guide for example when he does help you in sand kingdom he says 'oh there is a stone use me on him by throwing me into him to get across the bridge'. Those are the main things you need to know about cappy and what we can do and his Story.

This is what cappy looks like in super mario odyssey but in super mario run he doesn't look as 4k but in super manrun he looks more pixelated and not as realistic as the modern one. According to <https://www.mariowiki.com/Cappy> in super mario run 2017 you can see his statue on a stone podium also according to <https://www.mariowiki.com/Cappy> The languages are different from english.

Dutch cappy

Russian keppi

Italian cappy

German cappy

Spanish cappy

Japanese kyappi キャッピー=

Conclusion

Those are all the things you need to know about super mario odyssey well at least the basics of the game and the characters, bosses, and kingdoms, so as you can see those are my words of super mario odyssey and I hope that you will play it and become really good at the game so if you already play the game and if I taught you something new that's awesome.

Glossary

Koopa, a monster that helps you complete some levels

Kingdoms, the setting in the game

Bowser, a boss in the game but he is the big one

Morphs,going into another creatures body

What kingdom are you on and
what is the hardest boss you think
is.
